RE: Finding of Fact Order Condition # 4 which states "Refueling of all construction equipment shall take place with 1,000 feet of a public road."

Dear Alison,

My interpretation of this condition is as follows:

1. The term construction equipment is equipment which is self propelled and moves across the transmission line easement.
2. The small engine tools used by workmen during construction such as chain saws and portable generators which have a fuel capacity of 5 gallons or less would not be considered construction equipment.

If you have any questions feel free to contact me at 993-2512 or 632-4741.

Yours truly,

Robert Temple CEO/LPI
